

NV[®] Hybrid Braces

FOR A BEAUTIFUL SMILE DURING TREATMENT

Wear your new braces with confidence.

Nothing does more for your confidence than straight, beautiful teeth. You feel great knowing you always look your best, whether you're at work, with friends or spending time with someone special. When you have a perfect smile, you're more comfortable with your appearance, and more self-assured in every aspect of your life.

And now you can wear braces that will keep you looking and feeling great during your entire treatment. NV Hybrid Braces are less noticeable than ordinary braces. They combine a small stainless steel design with a clear base so people will notice your smile instead of your braces. With NV, you'll look great during and after treatment.

A partial view of a person's face and shoulder is visible on the left side of the page. The person has red lips and is wearing a dark, possibly black, garment with a ruffled or gathered neckline. The background is plain white.

Designed for you.

NV Hybrid Braces use a more cosmetic design so your braces are less noticeable than ordinary braces. The special hybrid braces combine a small stainless steel design and a clear base so you look and feel great all treatment long.

- Less visible than ordinary braces
- Small stainless steel design
- Non-staining ceramic material

NV[®]

HYBRID BRACES

Your perfect smile is right on schedule.

With NV Hybrid Braces you get straight beautiful teeth just as fast as you would with traditional braces. NV braces are strong, durable and designed to protect your teeth during treatment.

- No imperfections or breakage points
- Enhanced for your comfort with smooth, rub-resistant stainless steel
- Protection for your tooth enamel – exclusive polymer base pops off easily when your braces are removed
